

Due to the unprecedented snowstorms and cars parked in violation of the City ordinance, the City is continuing to take steps to address snow plowing issues.

The City will continue to ticket and in some cases tow illegally parked vehicles. Drivers should make sure they are parked in accordance with street sweeping routes and always park as close to the curb as possible.

As of February 5th, 2014 the Berwyn Public Works Director has initiated emergency snow removal activities due to the extreme amount of snow in the alleys. In addition to the ongoing snow removal efforts, front-end loaders will begin pushing snow in alleys starting Thursday and will follow the garbage pickup schedule. This may require residents to remove snow on their garage apron. Additionally, the use of heavy equipment in the alleys will create substantial noise that may be disruptive. We apologize for any inconvenience but these measures are necessary for removing snow from the driving portion of the alleys.

Please do not shovel snow into the alleys or streets as this is a violation of the City ordinance.
